International Board of Lactation Consultant Examiners (IBC International Board Certified Lactation Consultant® (IBCLC Detailed Content Outline	
I. Development and Nutrition	26
A. Infant	
 Feeding behaviours at different ages 	
Food intolerances/allergies	
Infant anatomy and anatomical/oral challenges	
Introducing complementary foods	
5. Low birth weight	
6. Milk banking – formal and informal	
7. Normal infant behaviours	
8. Nutritional requirements - preterm	
9. Preterm development and growth	
10. Skin tone, muscle tone, reflexes	
11. Term development and growth	
12. WHO growth charts with gestational age adjustment B. Maternal	
 Breast development and growth Breast surgery 	
3. Composition of human milk	
Maternal anatomical challenges	
5. Maternal nutritional status	
6. Nipple structure and variations	
II. Physiology and Endocrinology	24
, 0,	
 Infertility Issues Maternal metabolic and hormonal disorders (e.g., thyroid, Polycysti 	ic
Ovarian Syndrome)	
4. Maternal autoimmune disorders	
5. Multiples	
6. Newborn hypoglycemia	
7. Pregnancy and breastfeeding – tandem	
8. Relactation	
9. Stooling and voiding	
III. Pathology	31
A. Infant	
1. Allergies	
2. Ankyloglossia	
3. Cleft lip and palate	
4. Congenital anomalies (e.g., gastrointestinal, cardiac)

D.	Res	earch	
	1.	Apply research in practice	
	2.	Appraise and interpret research results	
	3.	Use research to help develop policies and protocols	
E.	Pub	lic Health and Advocacy	
	1.	Advocate for Baby-Friendly Hospital Initiative (BFHI)	
	2.		
		Code of Marketing of Breast milk Substitutes (WHO Code)	
	3.	Advocate for mother / baby in healthcare system	
	4.	Develop breastfeeding-related policies	
		Total Number of Items	175

Approximately half of the items will include images, and these will be administered in the afternoon session; items without images will be administered in the morning session. As supported by the practice analysis results, examination items should generally relate to the key tasks associated with developing a care plan, which include:

- 1. Assessment
- 2. Develop a plan
- 3. Document
- 4. Evaluate
- 5. Help mother determine goals
- 6. History taking
- 7. Work with other medical providers

Except for those items addressing general principles, items are classified according to the chronological period, using the following guidelines:

CHRONOLOGICAL PERIODS	Target # of Items*
Prenatal - maternal	8
2. Labor - maternal / birth - perinatal	9
3. Prematurity	12
4. 0 - 2 days	21
5. 3 - 14 days	21
6. 15 - 28 days	20
7. 1 - 3 months	12
8. 4 - 6 months	12
9. 7 - 12 months	5
10. Beyond 12 months	5
11. General principles (including preconception)	50
Total	175

^{*}Appropriate flexibility will be allowed surrounding these targets.
